Education

SUSHANT UNIVERSITY GURUGRAM

2025 – Currently

Bachelor of Computer Applications (BCA)

CGPA: 75

KENDRIYA VIDYALAYA

2025

Class XII: 65

Experience

Intern, GIEPDI, IIT Delhi

May 2026 – Jul 2026

- Performed experiments involving Arduino Uno and embedded systems.
- Studied the operation of NE555 timer circuits and operational amplifiers.
- Developed simple web applications using HTML, PHP, and MySQL.
- Prepared technical documentation and internship reports using LaTeX.

Projects

Arduino-Based Embedded Systems Experiments

- Developed and simulated an Arduino LED blinking circuit to understand digital output control.
- Interfaced a seven-segment display with Arduino UNO using a push button to implement a digital counter.
- Displayed patterns, symbols, and animations using an 8×8 LED matrix.
- Gained practical experience in Arduino programming, digital interfacing, and embedded systems development.

555 Timer Astable Multivibrator

- Designed an astable multivibrator using the NE555 timer IC.
- Generated square-wave signals and analyzed timing characteristics.

Inverting and Non-Inverting Amplifier using IC741

- Implemented and analyzed inverting and non-inverting operational amplifier configurations.
- Verified practical voltage gain with theoretical calculations.

HTML with MySQL Database

- Developed a student registration system using HTML, PHP, and MySQL.
- Implemented data storage and retrieval using SQL queries.

Battery Management System Dashboard Interface

- Developed a dashboard interface using HTML, CSS, and JavaScript.
- Implemented button controls for displaying battery information dynamically.

Technical Skills

Programming: C, C++, HTML, CSS, JavaScript, PHP, SQL

Embedded Systems: Arduino UNO

Tools: Arduino IDE, Visual Studio Code, MySQL

Documentation: LaTeX, Markdown, Git, GitHub

Languages

English, Hindi
